EDUCATION

University of Western Ontario

Bachelor of Science, Computer Science

London, ON

Sep 2025 – May 2029

- **Relevant Coursework:** Computer Science Fundamentals I and II, Data Science, Calculus, Linear Algebra

PROJECTS

Blueprint - 1st Place @ BearHacks 2026 | React, Tailwind CSS, Node.js, Three.js, Claude API April 2026

- Won **1st of 70 teams (300+ participants)** for an AI web app turning LEGOs into 3D builds with instructions
- Built a streaming image pipeline with **Google Cloud Vision**, cropping up to 25 padded bounding-box images
- Used **Gemini** (Flash 2.5) to classify brick color, size, and shape at approximately **90% accuracy**
- **Prompted Claude** (Sonnet 4.6) with **LDraw** coordinates to generate valid **3D** builds rendered in **Three.js** with **ElevenLabs** voice narration

Free Agency Steals | Python, SQL, PostgreSQL, Power BI March 2026 - April 2026

- Built an automated ETL pipeline processing **612 NFL player records daily** across **3 PostgreSQL tables**
- Fixed cross-source mismatches across **450+ free agent signings** using a two-phase fuzzy matching pipeline
- Built a Power BI dashboard grading **266 players** into an **A+ to F tier system** using a composite EPA index

WORK EXPERIENCE

AI Software Trainer

DataAnnotation

May 2026 – Aug 2026

Remote – Milton, ON

- Completed **200+** coding evaluation tasks reviewing AI-generated **Python** and **JavaScript** solutions for correctness, runtime efficiency, and best practices
- Specialized in **debugging AI-generated code**, isolating logic errors, uncovering edge cases, and writing structured feedback to improve **LLM** generation accuracy

Software Engineer

ClaireAI

Jan 2026 – Apr 2026

Remote – Milton, ON

- Diagnosed and resolved **integration failures** between real-time phone audio streams and the **OpenAI API**
- Triaged and documented **15+** backend defects into a reproducible issue tracker, replacing bug reports with consistent steps for the team
- Shipped **React** UI improvements to the client dashboard and configured **Supabase** row-level access policies isolating data by role across **10+** law firm clients

LEADERSHIP AND INVOLVEMENT

Director of Projects

Western Founders Network – Western University

Sep 2025 – Apr 2026

London, ON

- Shipped **3 full-stack products** with a team of 6: a Chrome extension, a short-form video trading app, and a Spotify Wrapped-style platform for Western University
- Guided projects from design through deployment using **React**, **Node.js**, and **REST APIs**
- Reviewed teammate pull requests across all 3 repositories in **Git**, catching bugs and improving structure pre-merge

Director of Internals

Western Developers Society – Western University

Sep 2025 – Apr 2026

London, ON

- Launched a **month-long mentorship program** pairing **30 students** with industry professionals, maintaining internal records tracking engagement across cohorts
- Organized **3+ coding events for 100+ students** and an intern panel connecting **60+ attendees** with **15+ past interns**, handling logistics, scheduling, and live troubleshooting

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Web: React, Node.js, REST APIs, HTML, CSS, Tailwind CSS, Three.js

Data and AI: pandas, PostgreSQL, ETL, Power BI, Claude API, OpenAI API, Gemini API, Prompt Engineering

Tools: Git, GitHub, Supabase, Google Cloud Vision, VS Code, Linux
